

Felicity

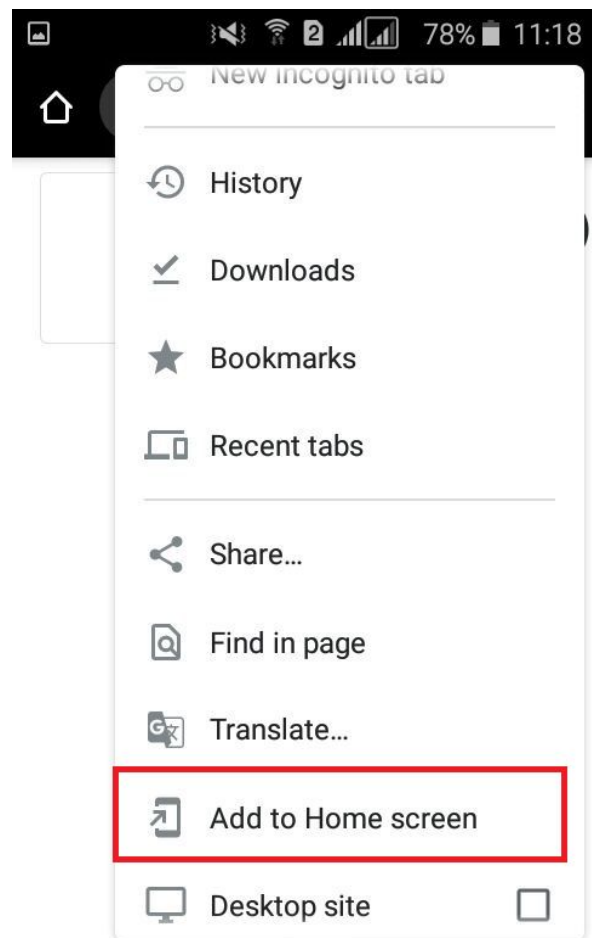

User Manual

Installation

The first time you access the application website <https://agiledev3.github.io/buyers-remorse-app/> with your mobile device, you will see a pop-up inviting you to install the application.

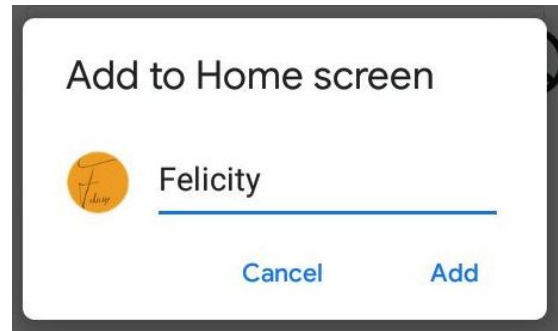

You can close this pop-up by clicking the “Close” button. If you decide to install the application, please follow these instructions: open your browser menu (e.g. three vertical dots in the right top corner for Google Chrome) and tap “Add to home screen”. In Safari you can see this button under the “Share” menu.

Tap the “Add” button in the displayed pop up.

After installation is complete you will be able to access the Felicity app through the home screen of your device.

Usage

The Felicity app has a few main features which will be covered in the following sections.

Adding a product

To add a product to a wishlist tap the blue plus sign button in the bottom right corner of the screen (shown right).

Product name:

New PC

Link to buy:

www.example.com

Why would you like to buy this product?

I need it for work! My old one keeps throwing BSOD at me!

How long should I wait before I remind you about this product?

Days 7

How long should I lock the buy button?

Days 30

This will take you to the Product Details page (shown left).

The fields “*Product name*” and “*Reason to buy*” are required, the “*Link to buy*” field is optional.

The reminder period field has a default value of 7 days and defines the frequency the app will remind you about your product with a new awareness question.

The lock period has a default period of 30 days and defines a period during which the purchase of this product is locked in the application.

Hit the green checkmark button to save the changes or the red circle with cross button to discard the changes.

When the changes are saved you will be taken to the homepage of the application where you can see your newly added item.

30 days to unlock

Editing a product

You can access the Edit page by tapping the pencil button.

This takes you to the edit screen where you can modify all data fields except for the “*Reason to buy*” field.

Hit the green checkmark button to save the changes or the red circle with cross button to discard the changes.

Awareness questions

The application contains a number of questions regarding your purchase which are designed to allow you to better consider your decision. Click the green button with the question mark on to see a new question appear.

Input your answer in the displayed question box and tap “*Confirm*” to save your answer. Tap “*Cancel*” if you are not ready to answer this question. When an answer is saved the counter on the button is increased.

You can review your previously given answers in the Product details screen by tapping the pencil button on the product list page for the product you want to view.

There are a limited number of questions for each product. Once you answer all of them, you will be simply asked whether you want to increase the “*buying score*” of the product. It is an indicator of how keen you are on making that particular purchase.

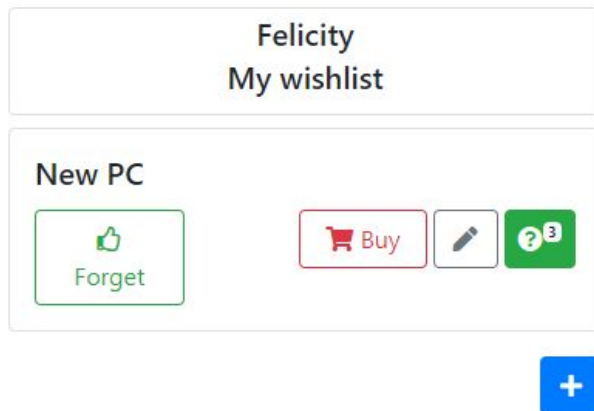

The products in the product list page are automatically ordered in descending order based on their buying score—you will see the products with the highest buying score first.

Removing a product

You can remove a product at any time by tapping the “*Forget*” button on the product list page. Successful operation will produce an alert.

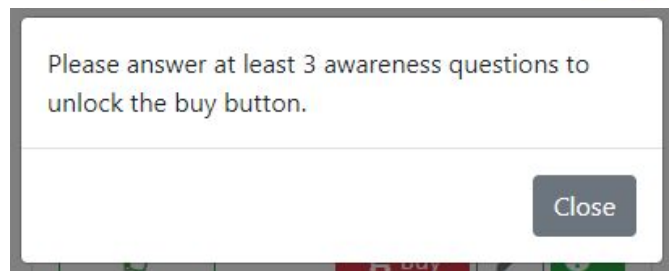

😊 The product has been removed from the list. Good job!

You can also wait until the end of the “lock period” and mark the product as bought. When the *lock period* has lapsed the “*Buy*” button becomes enabled.

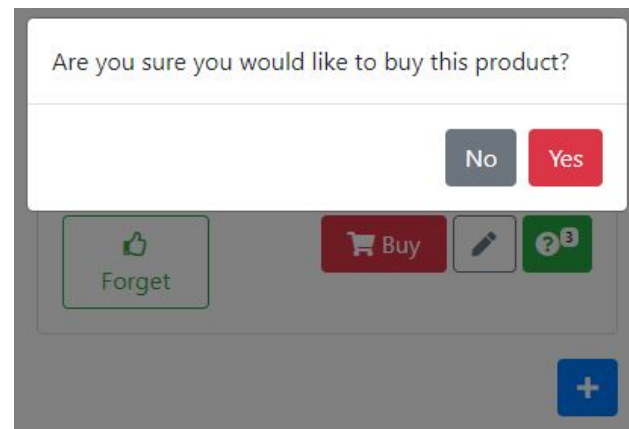

This operation also requires you to have answered at least three awareness questions.

If you don't have enough questions answered you will see a pop-up prompting you to answer more of them.

If you have enough questions answered you will see a confirmation pop up to buy the product.

Successful operation results in the following alert.

😞 The product has been marked as bought and removed from the list.

Notifications

If you allow push notifications for “*Felicity*” you can receive notifications prompting you to review a product. These notifications will be displayed at the frequency set on the product’s Edit page.

Hey, a reminder about New PC

It passed more than 7 days since you checked this product.
